How to Handle and Care for Your American Metalcraft Product

Melamine Dinnerware, Bowls and Platters

Preparation:

Prior to using your melamine for the first time, please wash thoroughly and dry.

Care and Use:

Wash your melamine product immediately after every use. Your melamine product is dishwasher-safe. It should only be washed in the top rack of the dishwasher.

Daily Care Notes:

- Never heat your melamine product in a microwave.
- Never use with a heat lamp or in the oven.
- We do not recommend serving any citric, acidic or strong-colored food products that would have direct contact with the melamine. These products can cause staining over time.
- PET Liners are available to protect some melamine pieces from staining.
