The hands need not be washed with soap or detergent prior to the use of such preparations. However, the hands must be rinsed with potable water after the use of the product and before handling food.

Hand sanitizing products (Category Code E3): Products manufactured from those solutions described in CFR Title 21, Section 178.1010, which are applicable for the purpose may be used to sanitize the hands of employees handling food products without a subsequent rinse provided they are germicidally equivalent to 50 ppm available chlorine. Products shall not contain perfumes leaving a residual odor on hands after usage. These sanitizing solutions may be used only after thoroughly washing hands with soap or detergent and water, followed by rinsing with potable water. In many instances, these hand sanitizers may be injected directly into wash/rinse water.

ASTM

A "test dummy" that simulates a child of predetermined size is strapped into the chair and various push, pull, and racking tests are conducted on the chair and also using the dummy to simulate forces required to remove dummy, and to determine the safety aspects of ensuring proper confinement within the chair without causing harm to the child.

ASTM 2285-04 is an American Society for Testing and Materials safety performance specification that establishes performance requirements, test methods, and labeling requirements to minimize the hazards to children presented by Diaper Changing Tables for commercial use with children up to 50 lbs.

SLIM JIM® CONTAINERS

80% EASIER TO LIFT LINERS

The Slim Jim® container is designed with four built-in venting channels that create airflow throughout the container. This air circulation reduces the vacuum effect that occurs when lifting out liners in traditional containers. By reducing the pull force required to lift out liners by up to 80%, the Slim Jim® container improves productivity and reduces the risk of injury.

WHY HYGEN™?

KILLING MICROBES DOESN'T MAKE THEM DISAPPEAR.

The CDC identifies cleaning as the first step in the disinfection process, because organic matter and debris interfere with the microbial inactivation of disinfectants.[1] Friction is a critical component of cleaning, whether it be surface cleaning or hand hygiene, because the mechanical action of scrubbing dislodges contaminants from surfaces, facilitating their removal.[1] HYGEN™ Disposable Microfiber assists in environmental cleaning by removing 99.7% or more of tested viruses and bacteria.*

Built-In Scrubbers

Innovative microbe-removing technology is complemented with built in scrubbers to effectively remove dirt.

With built-in scrubber technology

REMOVES

99.7%

OR MORE OF TESTED VIRUS AND BACTERIA, WITH WATER ONLY* TO STOP THE CHAIN OF INFECTION.

Microbe removal is a critical step in preventing infection because organic matter and debris interfere with the microbial inactivation of disinfectants.[1]

- Tested virus: Feline Calicivirus (surrogate for Norovirus), Common human coronavirus OC43
- Tested Bacteria: Methicillin-resistant Staphylococcus aureus (MRSA), Clostridioides difficile (C. diff), Pseudomonas aeruginosa
- Not tested on COVID-19

Rubbermaid® Commercial Products
WAVEBRAKE®

WAVEBRAKE® JUST GOT A WHOLE LOT BETTER

Rubbermaid Commercial Products introduced the first resin mop bucket in 1974. The BRUTE® mop bucket was introduced in 1995 with new ergonomic features. WaveBrake® was introduced in 2005 with a patented bucket and baffle design that reduced splashing for more efficient, safer mopping.

Rubbermaid Commercial Products continues to innovate, improving the industry-leading splash reduction and adding new features that surpass any other traditional mop bucket. These new features help the New Generation WaveBrake® clean floors with less effort to get the job done safer.

Proudly made in Winchester, Virginia, WaveBrake® features structural web-molded plastic construction to ensure the highest quality and durability you have come to expect while delivering industry-leading performance.

THE NEW GENERATION WAVEBRAKE®

UP TO 80% LESS SPLASH[1]

Patented WaveBrake® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff.

EASY TO EMPTY

A built-in drain eliminates the strain of lifting and bending when emptying mop buckets. Integrated handles help ensure a secure grip to lift and empty the mop bucket.

5-YEAR WRINGER GUARANTEE[2]

The side-press and down-press wringers are designed to last 5 years or 200,000 wringing cycles.

MOP CONSTRUCTION DEFINED

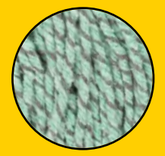

YARN TYPE

Mop yarn type is the most impactful driver of mop launderability, absorbency, durability, and release. Understanding mop yarn type helps drive proper mop selection for varying applications.

MICROFIBER TUBE

Most durable, stands up to abrasive cleaning and heavy-duty scrubbing with excellent absorbency.

MICROFIBER

Highly durable, non-abrasive general-purpose mop.

BLEND SHRINKLESS®

General-purpose mopping. Pre-laundered for reduced shrinking. Longer-lasting and less linting compared to cotton. Highly absorbent/no break-in required.

BLEND

General-purpose mopping. Longer-lasting and less linting compared to cotton. Highly absorbent/no break-in required.

COTTON

General-purpose mopping. Least expensive yarn option. Reliable liquid absorption. Requires break-in, dries slowly, may lint.

NON-WOVEN

General-purpose mopping. Least expensive wet mop option. Highly absorbent. Requires no break-in and delivers reduced linting versus cotton. Not launderable.

FINISH

Designed to provide smooth and even release of chemical and floor finish. Less linting compared to rayon.

RAYON

General-purpose mopping. Reliable liquid absorption. Highest quality of yarn. Resists mildew growth, extending mop life and white appearance.

SYNTHETIC BLEND

All-synthetic mop yarns resist abrasive floor surfaces.

CLEAN ROOM

Made of woven rayon/polyester fabric that will not fray or lint. For use in Class 10,000 and higher industrial applications.

ROUGH-FLOOR

Knitted fleece cotton/polyester blend yarn for highly abrasive surfaces. High absorbency.

NYLON

Non-linting, continuous filament yarn for finishing applications. High launderability.

HEADBAND TYPE

Headbands drive mop handle selection and can be made of cloth or mesh. Mesh headbands dry faster and can sometimes be used as a scrubbing tool due to the abrasive nature of the material.

1" HEADBAND

Most optimal with side-gate Invader® Wet Mop Handle.

5" HEADBAND

Most optimal with clamp-style Gripper® Wet Mop Handle.

UNIVERSAL HEADBAND

Compatible with Gripper® and Invader® Wet Mop Handles.

BOLT-ON HEADBAND

Works with Bolt-on Wet Mop Handle.

TAILBAND TYPE

Tailbands prevent tangling and improve floor coverage for more efficient mopping. Not all mops have tailbands.

WOVEN TAILBAND

Allows for commercial laundering. Most expensive type of tailband.

YARN TAILBAND

Requires handwashing or limited residential launderings. Economical tailband choice.

NO TAILBAND

Requires handwashing only.

END TYPE

Mop ends can be looped or cut, and ultimately impact mop launderability, fraying, linting, and unraveling.

LOOPED END

Reduces fraying, linting, and unraveling. Allows for laundering, extending lifetime. Generally more expensive.

CUT END

Economical and practical general-purpose mop. Ends may fray and unravel. Does not incorporate tailband, covering less area. Disposable or hand wash.

Dust Mopping

There are several important factors to consider when choosing a dust mop. Use the guidelines on the following pages to choose the best dust mop for your floor care needs.

General Dust Mopping

Choose mops with high-dust pickup and durability. If laundering is available, launderable mops will be the most economical choice. Microfiber looped-end and twisted-loop mop heads with reinforced stitching and slip-on/slide-off backing offer the best performance and launderability.

Mop Construction Features

Twisted-Loops
Highly effective at capturing dust and dirt. Premium Twisted-Loops are less prone to snags, frays, and unraveling during cleaning and laundering.

Looped Ends
Reduce fraying and deplying for better durability and longer product life. More effective than cut-end mops.

Cut Ends
Economical construction for general-purpose dusting.

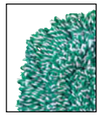

Reinforced Stitching
Reinforced, double-needle stitching at key "wear" points increases product life.

Backing Design
Slip-on/slide-off backing allows quick, easy setup or breakdown for standard mop frames.

Launderability

The launderability of a mop is based on the number of commercial washing and drying cycles it can withstand before the construction of the mop is degraded or the performance declines. Microfiber, synthetic, and blended fiber mops have the highest levels of launderability.

MICROFIBER

SYNTHETIC

Durability

The durability of a mop is a measure of how long it will perform before needing to be replaced. Microfiber, synthetic, and blended fiber mops are the most durable.

Mops with **antimicrobial fibers** have greater durability because they inhibit the bacterial growth that causes mop odor and discoloration.

MICROFIBER

BLEND

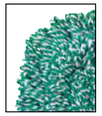

ANTIMICROBIAL

SYNTHETIC

Dust Pickup

Dust pickup is the ability of a mop to remove dust and dirt from the floor surface. Microfiber, blended fiber, and synthetic mops have the highest degree of dust pickup.

SPILL MOP

HIGHLY ABSORBENT MATERIALS

Absorbs up to 32 ounces (0.94L) of water and cuts the overall time required to completely remove a spill in half versus a cotton string mop, leaving a safer, drier floor.

CONVENIENT DISPOSAL

Integrated release lever helps avoid contact with soiled mop during disposal.

QUICK ACCESS

Storage cabinet mounts to the wall to keep mop pads and handle close at hand.

BIOHAZARD SPILL MOP

BETTER HEALTH & SAFETY COMPLIANCE

Biohazard Spill Mop Pad material is designed to absorb up to 13 ounces (0.4L) NaCl 0.9% or 32 ounces (0.94L) of water and turn it into a gel to prevent dripping and help make biohazard spill cleanup safe. The mop easily attaches to the mop head and includes an integrated release lever to dispose of the soiled mop, minimizing contact with hazardous materials.

STORE WHERE SPILLS HAPPEN

Biohazard spills can happen anywhere, including patient rooms and other places where space and storage is limited. The Biohazard Spill Mop Pads come in a compact dispensing carton and the handle is collapsible to fit in drawers or under desks. A mountable storage unit can be placed in high traffic areas.

ACCESSORIES & INDEX

Spills happen unexpectedly, creating hazards for patrons and staff which need to be cleaned up as quickly as possible to avoid injuries. Using a string mop and bucket can be time consuming and leaves the floor wet. Spill Mop makes it easier to quickly remove liquid spills, leaving the floor dry faster.

CASTERS TO MEET YOUR NEEDS

Rubbermaid's best-in-class heavy-duty casters have been specially chosen for each of our products to meet your most demanding environments.

THERMOPLASTIC RUBBER

TPR casters absorb shock, provide floor surface protection, and quiet operation. Chemical- and water-resistant.

POLYOLEFIN

Hard-tread polyolefin casters roll easier than soft tread casters. Nonmarking, impact- and chemical-resistant casters won't flat-spot under static loads or pick up metal shavings, nails, and other debris.

PNEUMATIC

Pneumatic casters provide a cushioned and quiet ride for fragile loads, making them ideal for rough and uneven surfaces, inside and out.

KEEP PRODUCE FRESHER LONGER*

The FreshWorks™ Produce Saver regulates the flow of oxygen and ethylene, creating the optimal environment to store fruits and vegetables. By allowing the produce to "breathe", the FreshWorks™ Produce Saver helps produce stay at their peak freshness for a longer period of time, reducing the amount of food thrown away due to spoilage.

*Based on produce stored in RCP FreshWorks™ Produce Saver vs traditional food box.

FILTER

The integrated filter naturally regulates the flow of oxygen to allow produce to remain fresh for an extended period of time.

DRAIN TRAY

The built-in drain tray promotes air flow while elevating produce from any residual moisture, preventing a soggy product.

AIR TIGHT LID

The air tight lid is easy to open and close helping to create the perfect environment within the container.
