

Bar Blenders

Powering the front of the house

Most bar blenders are pushed to their limit on a daily basis, so they need to be extremely durable and easy to use. These blending workhorses are built to last and can keep up with the demands of the busiest bars. All models feature intuitive controls, so bartenders can focus on blending and serving customers instead of wasting time on complicated functions.

HBB908R Series

HBB908R (120 V)

HBB908R (230 V)

908® Blender

1 peak* HP motor

Blend Drinks in 25 Seconds – Perfect for operations that serve 1-25 drinks daily.

Wave~Action® System – Unique container design continually forces mixture down into blades for a super-creamy drink profile every time.

Two Speeds – For easy control.

4 Durable Stainless Steel Blades – Made to last and get the job done fast.

44 oz./1.3 L Container – Break-resistant polycarbonate container with easy-to-read measurement marks.

Sure Grip™ Feet – Hold blender securely in place.

Lid Open Sensor – Prevents blending with lid removed (230 V only).

HBB255 Series

HBB255 (120 V)

HBB255 (230 V)

Rio® Blender

1.6 peak* HP motor

Blend Drinks in 15 Seconds – Perfect for operations that serve 15-40 drinks daily.

Wave~Action® System – Unique container design continually forces mixture down into blades for a super-creamy drink profile every time.

Optimized Performance – Wide square jar accommodates larger ingredients, reducing prep time.

High Performance Stainless Steel Blades – Quickly cut through ice.

Two Speeds with Pulse Option – Offers versatility and precision blending for a wide variety of drinks.

Lid Open and Jar Pad Sensor – Prevents blending if jar or lid is not on correctly (230 V only).

48 oz./1.4 L Container – Break-resistant BPA-free co-polyester container.

HBB255S Series

HBB255S (120 V)

HBB255S (230 V)

Rio® Blender

1.6 peak* HP motor

Blend Drinks in 15 Seconds – Perfect for operations that serve 15-40 drinks daily.

Wave~Action® System – Unique container design continually forces mixture down into blades for a super-creamy drink profile every time.

Optimized Performance – Wide square jar accommodates larger ingredients, reducing prep time.

High Performance Stainless Steel Blades – Quickly cut through ice.

Two Speeds with Pulse Option – Offers versatility and precision blending for a wide variety of drinks.

Lid Open and Jar Pad Sensor – Prevents blending if jar or lid is not on correctly (230 V only).

32 oz./0.95 L Stainless Steel Container – Built for long-lasting performance.
