CLEANING

Scotsman®
The Ideal Ice®

SCC30 Cleaning Instructions

Ice Making System

1. Turn machine off
2. Remove all ice from the bin
3. Pour 8 oz. Scotsman "Clear 1" Scale Remover into the reservoir (Part # 19-0653)
4. Turn machine on and let run for 2 hours
5. Pour hot water into the bin to melt any ice that has formed. Ice will likely look frosty and white
6. Clean bin by mixing some cleaner with hot water and scrub remaining scale remover
7. Rinse bin with hot water

4. Press and hold ON/Off button and Clean button for 5 seconds (lights will blink)
5. Pour 8 oz. "Clear 1" Scale Remover into reservoir (Part #19-0653)
6. Turn machine on and run for approximately 30 minutes
7. Press and release On/Off button to begin flushing the solution
8. Allow machine to run for 30 minutes more
9. Press and release On/Off button to stop the process
10. Clean bin by mixing some cleaner with hot water and scrub remaining scale
11. Rinse bin with 1 gallon of hot water and then sanitize
12. Press and release On/Off to restart

SCN60 Cleaning Instructions

Ice Making System/Water Reservoir

1. Turn machine off
2. Remove all ice from the bin
3. Remove scoop and fold metal bar flush to bin wall
4. Remove back panel by loosening thumb screws
5. Locate reservoir, push tab, lift and remove cover
6. Push white float valve up (On/Off lever) to shut off water
7. Pull drain plug to drain system and return plug
8. Add pre-mixed Scotsman Scale Remover into reservoir until full (Approximately 8 oz./Will need 16 oz. total)
   - Part #19-0664

STEP 4

STEP 5

STEP 6

STEP 7

STEP 8

9. Push and hold both ON/Off and Clean buttons for 5 seconds
   - Time to Clean light will begin to blink
   - Auger motor only will operate for 10 minutes
   - Compressor will turn on
10. Allow compressor to run and continue to add solution maintaining level at ½ full while unit makes ice
    - Compressor will shut off after approximately 40 minutes
11. Once all solution has been used, push float valve down (On/Off lever) to turn water on
12. Pull drain plug to drain system and then re-plug
13. Return reservoir cover and back panel
14. Clean bin by mixing some cleaner with hot water and scrub remaining scale
15. Rinse bin with hot water to sanitize
16. Push and release On/Off to restart

Due to low level of water draining through the machine,
Scotsman recommends regular sanitizing of the drain system.
