

## DON'T COMPROMISE...CUSTOMIZE.

Last month we were contacted by a school board member wanting us to help show some love to their Foodservice Director.

We couldn't wait to get started. After visiting their small store room, we started working on a plan to maximize the available space.

Canned items were taking up a lot of the available shelf space, so the first thing we designed was a counter-depth FIFO Can Rack to maximize their storage area.

With this unit, cans are loaded and retrieved from the front providing easy stock rotation while the unit remains secured to the wall for added stability and safety.
