

ePAN® Bun Pans

Chicago Metallic ePAN® Bun Pans are manufactured from high-tensile strength aluminized steel which produces a pan that is thinner and lighter, yet substantially stronger than traditional pans. Using less metal also means ePAN Bun Pans heat faster and cool more quickly.

Energy Efficient

ePAN uses a thinner gauge but higher tensile strength aluminized steel that allows the pan to heat up and cool down faster, resulting in reduced energy costs.

Environmentally Sensible

ePAN requires a substantially lower volume of raw material resulting in less resource consumption.

Ergonomically Sound

The lighter weight ePAN – weighing up to 25% less than a traditional pan – makes handling more manageable and less stressful for employees.

Extended Pan Life

The high-tensile strength of the aluminized steel minimizes the potential for pan damage.

BUNDY BAKING SOLUTIONS:

-  Baking Pans
-  Pan Coatings
-  Release Agents & Applicators
-  Refurbishment Services

AMERICOAT® ePlus

AMERICOAT® ePlus silicone release coating is the industry's leading silicone coating technology used on all Chicago Metallic glazed pans. AMERICOAT ePlus features longer-lasting performance and reduces the need for oil usage up to 50%.

Pan Glo® Recoating Services

Your pans can be cleaned, recoated, and returned to your operation with like-new release characteristics. For more information, call 800.652.2151 or visit our website at panglo.com.

Item #	In Stock	Coating	Description	Arrangement	Overall Size (in)
