Eagle wire shelving must be cleaned with soft cloths and mild detergent. Using harsh detergents, abrasive materials, scrapers or stiff brushes will void this warranty. In addition, any physical damage, rupturing the coating, or sustained exposure to corrosive substances and vapors is not covered. Warranty applies only when shelves have been continuously used within a temperature range from -20˚F to +120˚F, with intermittent exposure up to +200˚F for Valu-Gard®, Valu-Master® or EAGLEgard® epoxy finishes, and up to +175˚F for chrome or EAGLEbrite® zinc finishes. The customer agrees to use only cleaners that are recommended for use on epoxy-coated steel. Eagle plated shelving finishes are not intended for use in an automated cart wash system and such use will invalidate the warranty. In the event of a warranty claim, an Eagle representative will review the claim and provide disposition. A shelf may need to be returned for inspection and testing to determine if a claim can be paid. Returns, including disassembly and subsequent reassembly, become the responsibility of the initial owner. If it is found after outside testing that the issue came from misuse, neglect, or failure to follow cleaning guidelines the cost of testing may be charged back to the customer.
