MODULAR DIVIDER WALL SYSTEM

Luxor's Modular Room Divider Wall system helps you establish healthy distances and promote productivity in offices, classrooms, healthcare environments, retail spaces, and more. The system is built around a mix of sound-absorbent PET and semi-transparent frosted acrylic inner panels that you can arrange to optimize privacy, noise reduction, and natural light.

Since a single "Starter Wall" is freestanding, it can be used as a stand-alone solution. Or, you can connect a practically infinite number of "Add-On Walls" at both 90-degrees (right angles) and 180-degrees (straight lines) to create a custom configuration for virtually any work or learning space. Each wall features a built-in cable management tray to help keep cords organized, and its durable aluminum frame with a sturdy steel feet ensures stability and years of trouble-free use.

Dimensions:

- Overall (wall models available in four sizes):
