What's So Great About Being PC?

Our Polycarbonate [PC] food pans are rugged and can withstand a broad temperature band of 40°F to 212°F (not intended for steam table use.) These pans are break-resistant and won't bend, rust, crack or dent. They are quieter than their metal counterparts. Outer graduation markings allow for easy inventory management. These marks appear in both standard and metric measurements. Clean-up is quick and easy due to the PC construction being resistant to food oils and acids.
