## ARCOROC

Opal and Zenix offer the following advantages:

- Zenix: Mineralized dinnerware adding up to 7x resistance vs. other materials.

Opal and Zenix don't have a glaze - they are one homogenous piece with 0% porosity

Ceramic Glaze - any hole or flaw in the glaze allows access of bacteria into the porous body

# Reusable 'To-Go' Solutions That Are Transforming The Market

Students are constantly on the go. Whether it's a grab and go or take out from the dining hall. These reusable containers put your students health first, while helping the campus cut down on waste. These containers are highly shock resistant and hygienic (glass barrier against bacterias). Lids are air-tight, so there's no degradation of the taste, smell, or the composition of food.

## - EXAMPLE ONE -

Replace plastic take out boxes with this microwave-safe option. The student would 'check out' the container. Next time they are in the dining hall they return to a designated area for cleaning.

## - EXAMPLE TWO -

Add these containers to your student's meal plan. Students will be able to swipe thier card for their grab and go food. The student would incur an additional charge when taking the container. When the student returns the container, they are able to get a credit for their next purchase.
