

Xpress Touch

Here in the Pacific Northwest, we're known for a couple of things: innovative technology that's simply reliable, and great tasting coffee. At Concordia, we join those forces.

The Xpress Touch brings an all-in-one latte solution to the masses. Our engineers challenged themselves to produce breakneck drink speed without compromising on quality. With our patented technology, The XT is prepared to quickly serve quality drinks with perfectly steamed milk every single time. Our classic cafe menu makes drink-making a breeze, whether operated by customer or staff.

Never managed a coffee program before? Our system manages all parameters so you don't have to! Let your drinks speak for themselves – our on-site install team will calibrate grind, extraction, temperature, volume, and flavor to your profile. Looking for onboard syrup integration? Ask us about the Xpress Touch 6.

Perfect for:

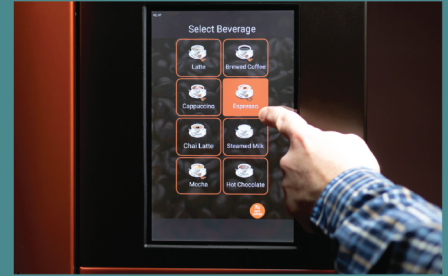

- Quick Service
- Convenience kiosks
- Drive-Thru
- University cafeteria
- Hotel Lobbies

Cup Quality	Focus on the Guest	Faster Solutions
Offer the finest cafe beverages that automation can offer: Latte, Cappuccino, Traditional Macchiato, Espresso, Steamed Milk.	Clean with ease! Daily maintenance takes 10 minutes, and regular preventative maintenance every 6 months allows your team to pay attention to the people in front of them, not troubleshooting.	When you are due for Preventative Maintenance or need help calibrating to new product, call Concordia Technical Support 24/7. Our Concordia-certified agents around the U.S. are here to serve you!

10" Touch Screen

Our intuitive cafe menu is built with customers in mind. Let us help you build a customization to match your program!

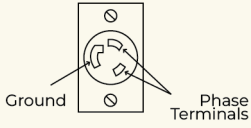

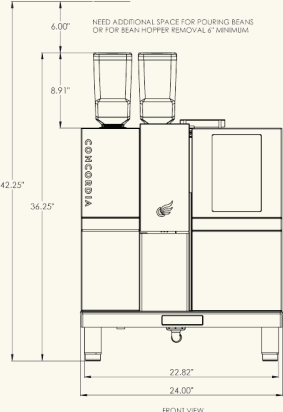

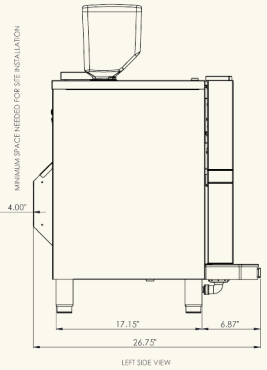

Built in Fridge

With a 2-gallon capacity, offer two milk options, or simply have two of the same. Offer Whole, 2%, or even Skim milk, depending on your local preferences.
