OVEN AIR DEFLECTOR PLATE: *For baking delicate foods in Cadco Convection Ovens*

2 Air Deflector Plates shown in use in full size oven with 2 fans.
Use one plate per oven fan.

XC606: Oven Air Deflector Plate

- Deflects air in oven cavity; for baking delicate foods like puff pastry and meringue, so they do not fall or move on the baking pans due to the powerful standard air flow of the fans.
- The XC606 plate hooks onto the fan grille inside the oven cavity when needed. Quick and easy on/off; no tools required.
- Use one XC606 plate per oven fan. Full-size 4-shelf XAF/XAFT oven models have two fans, so require two XC606 plates.
- Heavy duty stainless steel & brass construction
