LK® Static Control Products

Electronic components are easily damaged by static electricity and need the protection that LK's anti-static products provide during packaging, storing and shipping.

HOW TO SELECT AN ANTI-STATIC BAG:

1) Determine what level of electro-static protection is required

- Pink Anti-Static material provides excellent protection against static discharge
- StratoGrey™ material has a buried metal construction that provides a double layer of protection against static discharge
- Barrier bags protect against static discharge, EMI/RFI radiation as well as moisture and vapor

PINK ANTI-STATIC BAGS AND TUBING

Effectively eliminates the hazard of static damage to sensitive electronic components during packaging, storing and shipping
Surface resistivity of 10^{12} ohms / sq. in.

Bags can be heat sealed
Pink Anti-Static material is an excellent choice when static control is necessary, but Faraday Cage protection is NOT required
Amine-free

BARRIER BAGS

- Protect contents against electrostatic discharge and EMI/RFI radiation
- 3.6 mil bags are waterproof, vapor proof and greaseproof
- Designed for dry packaging of moisture-sensitive electronic
- components
- Superior ESD and EMI Shielding
- Heat sealable
