GTB-88 Washroom Accessories LEED Information

Gamco uses type-304 stainless steel in the manufacture of its washroom accessories. The stainless steel material used contains a significant amount of post industrial recycled stainless steel content balanced with virgin iron and ferrous alloys.

The recycled stainless steel content varies because Gamco sources stainless steel worldwide and Gamco products are manufactured in different locations.

The following numerical list of Gamco models indicates the percentage content of recycled stainless steel in each product.

Model No.	Recycled Stainless Steel Content
100CHSS	50-65%
125 Series	65-70%
150 Series	65-70%
