

Cleaning & Care Instructions

Titan Stools –Steel, Wood or Laminate

National Public Seating is committed to providing high quality furniture that will last for years.

With proper care and maintenance, your furniture can look its best for many years.

Steel

Always test a new cleaning product in an inconspicuous area first to make sure it is safe to use.

Regular Cleaning:

Wipe down the stools regularly with a soft, damp cloth to remove dust, dirt, and any spills.

For stubborn stains, use a mild soapy solution with warm water. Avoid abrasive cleaners as they may scratch the metal surface.

Avoid Harsh Chemicals:

Do not use harsh chemicals, solvents, or abrasive cleaners, as they can damage the finish of the metal.

If necessary, test any cleaning products on a small, inconspicuous area before applying them to the entire stool.

Storage:

If the stools will not be used for an extended period, store them in a dry, well-ventilated area. Stack or store the stools in a way that prevents them from scratching against each other.

Regular Inspections:

Periodically inspect the stools for loose screws or bolts. Tighten any that may have become loose to ensure stability.

Wood

Always test a new cleaning product in an inconspicuous area first to make sure it is safe to use.

Regular Cleaning:

Wipe the wooden seat regularly with a soft, dry cloth to remove dust and prevent buildup. For more thorough cleaning, use a slightly damp cloth with a mild, soapy solution. Avoid soaking the wood.

Avoid Excessive Moisture:

Prevent prolonged exposure to moisture, as it can lead to warping, swelling, or damage to the wood.

If the stool gets wet, dry the wooden seat promptly with a clean, dry cloth.

Protect from excessive Heat/Sunlight:

Avoid placing the stool in direct sunlight for extended periods, as it may cause the wood to fade or crack.

Keep the stool away from direct heat sources, such as radiators or heating vents.

Wood Polish or Wax:

Periodically apply a high-quality wood polish or wax to nourish and protect the wooden seat.

Avoid Harsh Chemicals:

Do not use abrasive cleaners, harsh chemicals, or strong solvents on the wooden seat, as they can damage the finish.

For stubborn stains, use a mild solution of water and gentle dish soap.

Regular Inspection:

Periodically inspect the wooden seat for any signs of wear, scratches, or loose joints. Address any issues promptly to prevent further damage.

Laminate

Always test a new cleaning product in an inconspicuous area first to make sure it is safe to use.

Regular Cleaning:

Wipe the laminate surface regularly with a soft, damp cloth to remove dust, dirt, and spills. For stubborn stains, use a mild soapy solution with warm water. Avoid abrasive cleaners that may scratch the laminate.

Avoid Harsh Chemicals:

Do not use harsh chemicals, bleach, or abrasive cleaners, as they can damage the laminate finish. If necessary, test any cleaning products on a small, inconspicuous area before applying them to the entire laminate surface.

Protect from excessive Heat/Sunlight:

Avoid placing the stool in direct sunlight for prolonged periods, as it may cause the laminate to fade or become discolored. Keep the stool away from direct heat sources such as radiators or heating vents.

Avoid Excessive Moisture:

Wipe up spills promptly to prevent moisture from seeping into the laminate. Do not use excessive water when cleaning, and ensure the surface is dried thoroughly after cleaning.
